JUDESON BRIAN CALEB RODRIGUEZ

Full Stack Developer & Technical Lead

judeson.rodriguez@gmail.com | +91 797-203-7493 | Bengaluru, India | GitHub: www.github.com/zvdas
Portfolio: zvdas.github.io | LinkedIn: www.linkedin.com/in/zvdas

PROFESSIONAL SUMMARY

Full Stack Developer and Technical Lead with 3+ years of experience building web applications using Angular and Firebase. Experienced in developing end-to-end features, backend logic using cloud functions (Node.js), and designing reusable architectures. Currently focused on strengthening backend development with Node.js and REST APIs, while leveraging AI-assisted development workflows.

SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML, CSS
Backend: Node.js, Express.js (learning), Firebase (Auth, Firestore, Cloud Functions), REST APIs
Databases: Firestore, SQL, MongoDB (learning)
Concepts: Application Architecture, Modular Design, API Design, Authentication
Tools: Git, GitHub, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Technical Lead – Full Stack Developer | ThinkTac (Tactile Education Services Private Limited)

June 2023 – July 2026 | Bengaluru, India

- Led a team of 5 developers, providing **technical direction, code reviews, and mentoring** to ensure consistent development practices
- Designed and implemented **multi-project support architecture**, enabling shared logic and scalable feature reuse across applications
- Developed and maintained applications using **Angular and Firebase**, including backend logic via **Cloud Functions (Node.js)**
- Built a **script runner system** to execute configurable backend workflows and automate repetitive operations
- Integrated applications with **external client websites and services**, enabling cross-platform data flow and functionality
- Worked with **SQL databases** for select projects, handling data queries and integration with application logic
- Abstracted and refactored frontend components to improve **reusability, maintainability, and modular architecture**
- Optimized application performance by reducing **component load and bundle size**, improving overall efficiency
- Collaborated on feature design and implementation, contributing to **end-to-end application workflows**
- Actively leveraging **AI-assisted development tools (e.g. Claude Code)** to improve development speed, refactor codebases, and enhance implementation quality

SDE Intern | Angular Wiki (Maargvani IT Solutions Private Limited)

November 2022 – May 2023 | Remote

- Developed a drug inventory management module with real-time stock tracking using Angular Material and RxJS, improving accuracy and reducing manual data entry effort

- Automated generation of compliance reports using PDFMake for prescription workflows, reducing manual effort and streamlining documentation processes
- Built Python-based data collection scripts (BeautifulSoup, Selenium) to automate aggregation of pharmaceutical product data, significantly reducing manual research time

PRIOR EXPERIENCE

2016-2020: Operations and marketing roles in automotive and engineering sectors

EDUCATION

Bachelor of Mechanical Engineering | Vishveshwarya Technical University | 2015
